As **The Floorware Report** was being *published*, **Floor Covering Media**'s **research team** *found* **two (2) geolocations** for this **b2b software supplier**; **one** of **them** was *in* **Hammond**, **Louisiana**; whereas the **other one** was *in* **Lynn Haven**, **Florida**. **Floor Covering Media** *presumes* the **head quarters** of this **software supplier** was *relocated* from **Louisiana** to **Florida**.

This **Lynn Haven**, **Florida**-*based* **company** is the *inventor* of **Roll Master Floor Covering Industry Software**, which *empower* **flooring businesses** of **any size** to *operate* **more efficiently** and **more effectively**. Their **software** *connect*s **everything**; *from* the **back office** *to* the **boardroom**; and *from* the **warehouse** *to* the **storefront**. *From* **desktop machines** to **mobile devices**, it *empowers* **flooring organizations** *to* **work together -- more efficiently**. This **result** is *achieved* by *extending* the **availability** of its **real-time data**, **permission-***based* **software** and **data**, which *enables* **flooring businesses** to **work** *at* **anytime** *from* **anywhere**. This *includes* **on-premise Server installations**, **delivery** *via* **RollMaster cloud** and/or *via* **mobile devices**. The **company** *believes* that the **RollMaster System** *empowers* **growth** and *creates* **added value** for its **flooring industry clients**. **RollMaster** *was* the **first floor covering software** *featured* in **Floor Covering Weekly**; *published in* **its July 11**, **1979 Issue**: **volume 28**, **number 24**. **RollMaster** *remains* a **leader** in **today**'s **cost**-*effective*, **data processing**

technology for the **floor covering industry**. **Roll-Master** is *available* in **versions** which will *run* in **MSDOS®**, **Windows®**, **Windows 95®**, **Novell®**, **Lantastic®**, **Unix®**, **Xenix®** & ~ **500 other operating systems**. It is **modular** *in* **design**, *providing* **real-time data interactivity**.
