What customers say about ARTILLERY TOOLS

Tigard, Oregon / Elizabeth G. Yokel / Press Release / December 5, 2015. Customers can influence buying decisions with comments about the product. Without an incentive to exaggerate the overall effectiveness of the product, influential customer opinions are usually the most convincing ones that a prospective buyer is likely to value and trust when making buying decisions.

TESTIMONIALS

Had mine for 2 years Dont have any issues with it we had 2,500 sq ft of wood glue demo one side regular bars and the other half we had our artillery bar 5 hours to remove 200sq ft regular bar artillery 50 minutes perfect tool

Abel Lopez, Owner

A&A Restoration

Fontana, California

<https://plus.google.com/115534637388713857193>

One customer is Abel Lopez, owner of A&A Restoration in Fontana, California who has been using ARTILLERY TOOLS for a couple of years. During that time, Mr. Lopez. has had no issues. In the paragraph below, he shares an intriguing story about a performance test he conducted at one of the jobsites. ARTILLERY TOOLS was tested against the other bars when 2,500 square feet of glued down wood had to be removed. The project was divided into two equal parts. The first half of the project was completed using one of the regular bars and the second half of the project was completed using ARTILLERY TOOLS.

The ARTILLERY TOOLS challenge that Mr. Lopez had decided to conduct during that day produced results at the jobsite nothing short of remarkable: The reason why the first half of the project was so challenging was because it required a grueling 5 hours or 300 minutes to complete using the regular bars. The reason why the second half of the project was less challenging was because it required a considerably less grueling 50 minutes to complete using ARTILLERY TOOLS.

Comparing the two, it required 1/6 of the time, to complete the same task. This translates into an ~83.3% time savings. With results like these, should it come as any surprise more contractors are asking for ARTILLERY TOOLS by name? Mr. Lopez is one of many satisfied customers with something to say about this revolutionary tool system can do for you. Click [HERE](#) for the rest of the customers testimonials with great things to say about what this tool system has done for them.

Convincing commentaries and demonstrations of a remarkable tool in action.

Trade Show Customers Commentary

Here is what several satisfied customers are saying who are pleased with the performance of ARTILLERY TOOLS.

Demolition professionals are not the only ones benefiting from the added advantages that this tool system is providing. The Artillery Tool System is popular among do-it-yourself homeowners too. Watch some homeowners, self-made videos:

Customer's Self-Demonstration, Video #1

Watch the convincing video a customer created and uploaded to demonstrate the effectiveness of this remarkable

tool.

Customer's Self-Demonstration Video #2

Above is another convincing video demonstrating the unnecessary amount of back-straining effort required for tearouts with less efficient demolitions tools. First, the customer tries tearing up the floor using a crowbar with poor results. Next, the customer continues the job with remarkably better results using one of the many ARTILLERY TOOLS.

Customer's Self-Demonstration Video #3

Watch Joel Bennet explain how an ARTILLERY TOOL rips up a plank floor in a fraction of the time that it would require using an ordinary crowbar for the job.

ARTILLERY TOOLS delivered their first tool set in the fall of 2007. Since then, the company has been continuing to develop additional pieces expanding their tear-out capabilities into almost every aspect of remodeling demolition. Customers have the ability to assemble over 180 different tool combinations providing them with several different bar options for the same tearout situation. Multiple combinations ensures the tearout problem is properly resolved with the most effective tool available.

ARTILLERY TOOLS understands the challenges homeowners and contractors face and is devoted to making demolition jobs easier. This prybar system is the only light weight prying system featuring interchangeable blades, handles and fulcrums contained in a sturdy carrying case that can go to every jobsite.

The ARTILLERY TOOLS system is designed to be adapted to handle many different demolition situations saving time and money.
