An elevator floor you can actually see through

Toronto, Ontario, Canada, Press Release, Floor Covering Media, January 11, 2016: On April 9, 2008, the elevators at the CN Tower were the first in North America and the world's highest, glass floor paneled elevators. The partially transparent elevator surface allows for a revealing glimpse below during a 346 meter (1,136 foot) ascent to the tower's top. The view of the ascent is through the two glass panels installed in each of the three elevators.

Elevators travel at 22 kilometers per hour (15 miles per hour). It takes less than a minute to reach the top of the tower according to CN Tower's website. The high-speed glass-fronted elevators offer a breath-taking view of the city.
