Q Acoustics 3050i, Floorstanding speakers

Remember the Q Acoustics 3020i book shelf speakers known for its punchy, well-controlled bass and sweet treble tones?

Found them impressive? Prepare yourself for the next generation of sound: Q Acoustics 3050i floorstanding speakers. The fulsome sound they deliver obviates the need for a subwoofer. Yet they aren't so large that they take over the home.

In the market for a great pair of speakers at a price that won't break the bank? Well, you're in luck; or so it would seem.

The streamlined speakers are crafted in a slender width; they have gently curved shoulders. They may seem too narrow to be completely stable. However, there are outrigger foot screws, which can fasten onto the rear side of the speaker, which may provide safety conscious users with sufficient stability without making it arduous to place in a narrow setting.

Once in place, the spikes can be adjusted using a hex key to get the level correct on an uneven floor; an ideal feature for those with carpeted living rooms. Rubber shoes slip over the spikes to protect the sensitive surface of a hardwood floor.

Specs:

Enclosure type: 2-way reflex
Bass Unit: 2 x 165 mm (6.5 in)
Treble Unit: 22 mm (0.9 in)
Frequency Response (+3 dB, -6 dB): 44 Hz – 30 kHz
