Basement

The basement or the cellar is the level or levels of a home or a building that's completely or partly below the ground floor.

Basements are utility spaces for the boiler, water heater, breaker panel or fuse box, car park and air-conditioning system, as are amenities such as the electrical distribution system and cable television distribution point. While basements are rooms below ground level, cellars refer to the whole underground level. Subcellars are other levels underneath the cellar.

Your Gateway to the Floor Covering Industry

In pricey property areas, finished basements are not uncommon. Some property owners construct habitable living spaces within basements for additional living space.
