According to [Wikipedia](#), Ring integrates with an associated mobile app, [Neighbors](#), which allows the apps' users to view real-time video from the camera, receive notifications when the doorbell is rung, and speak with visitors at the doorstep through the integrated speaker and microphone. Additionally, it is capable of operating as a surveillance camera. It can trigger recordings when rung, or when its motion sensors are automatically activated.

Ring also released The Stick Up Cam (a wireless IP Camera), which was later updated with a cylindrical form factor, motion detection, two-way audio, battery, and a pair of convenient power alternatives: wired or solar paneled.

Amazon's Ring unit recently debuted its Always Home flying security camera at some point in January 2023. It works with Ring's home security technology.

This aerial indoor camera, which flies on a predetermined path when activated by an alarm sensor, was unveiled in September 2020. It uses light detection and ranging (LIDAR) laser sensors to create a flight path around your home; the scheduled launch date of this product is currently unknown.

This device, which works with your smart phone was introduced as a concept in 2021 and may be available at some point in 2024. It is an autonomous flying vehicle in your home; that's not designed for use if people are at home.
