Starlink Mini is a dish the size and thickness of a laptop, it delivers speeds of over 100 Megabytes Per Second (Mbps) from almost anywhere on the planet.

The Mini kit actually consumes far less power than the standard Starlink dish, which means that even a portable battery can power your device for an hour.

Your Gateway to the Floor Covering Industry

Notably, it integrates the Wi-Fi router inside the dish; obviating the necessity of a separate AC-powered router. Less equipment is likely to lighten the load.

It costs \$599 plus \$30 per month for the roaming service added to existing \$120 residential plans. Learn more about Starlink Mini. Watch the video [here](#).
